

EMCO puts ultra-miniature high voltage converters on fast track.

Sutter Creek, CA -- October 30, 2008 – EMCO High Voltage Corp., the worlds-leading manufacturer of miniature high-voltage DC-DC converters, announced it is reducing the standard lead time for its Ultra-Miniature Q Series to one week. A conversion to Lean Manufacturing supports our rapid response and enables value pricing. EMCO also provides an inventory of finished product at its headquarters in California and at its stocking distributor in Europe, Condatas AG.

As of October 30, 2008, EMCO's ultra-miniature power supplies will be offered with a lead time of just one week. For high quantities, EMCO will quote the lead times with competitive pricing. Please consult with EMCO's Sales Department.

For lead times and other information on specific modules, please contact the EMCO sales team at sales@emcohighvoltage.com or (800) 546-3680.

Q Series Description

The Q Series is a broad line of ultra-miniature, DC to HV DC converters supplying up to 5,000 volts in 0.125 cubic inches and up to 10,000 volts in 0.614 cubic inches. These component-sized converters are ideal for applications requiring minimal size and weight. The output is directly proportional to the input voltage, and output power is 0.5 watts. No external components or minimum load are required. Light weight, low power consumption and wide temperature range make these units ideal for portable, battery-powered equipment. See datasheet at www.emcohighvoltage.com/Qseries.PDF

About EMCO High Voltage Corporation

EMCO's industry leading high voltage designs have garnered several product awards including: "Key Partner Award" from the University Wisconsin for Project ICECUBE; "Most Innovative New Product of the Year" in the field of electrical engineering from the University of California, Davis;" Product of the Year" from Electronic Products Magazine; "Product Technology Award" from ECN Magazine; "Runner-Up Product of the Year" from Electronic Engineering Product News; six "Editors Choice" awards from Electronic Products Magazine, and the Governor of California's "Older Worker Recognition, Employer Excellence Award."
